

°sphere

Bart lens needed a large lamp that would create an encircling sphere of light above the conference table in their office, and so began the search. After a long and fruitless quest, he finally decided to design his own mega-light with the “sphere” of a dome.

The result has been likened to a “Calimero” dome, a giant bell, a half moon....
Everybody seems to have a different name for it.

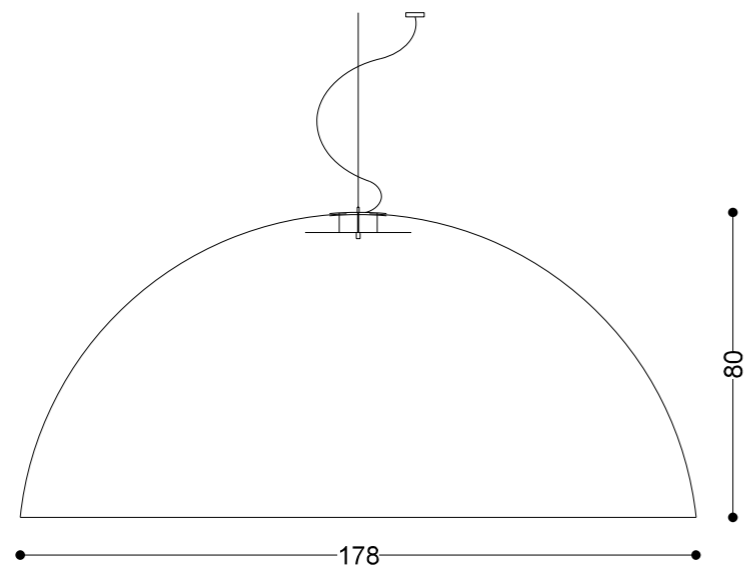

design by Bart Lens.
